Academic Projects

1.	<ul style="list-style-type: none">• Project: PURUSKAR-PEDIA (Jan 17 – Apr 17)- Description: Developed a website cataloging national award winners.- Technologies: HTML, CSS, JavaScript, basic SQL/PHP.- Team: Collaborated with a team of two members.- Role: Front End Developer for user interface
2.	<ul style="list-style-type: none">• Project: TABLE-FOOD (Jun 10 – Aug 1)- Description: During the period from June 10 to August 1, I undertook the development of an interactive website designed to streamline the process of booking tables, halls, and menus for various events. The primary goal of the project was to provide users with a convenient platform to plan and organize their events, ensuring a seamless booking experience.- Technologies Used: It utilizes a range of technologies, including HTML, CSS, ,JavaScript.React.js, (Sql/Php basic)- Team Project: Developed it solo
3.	<ul style="list-style-type: none">• Project: HIRE-ME (Apr 15-jun 10)

	<p>- Description: This platform was designed to bridge the gap between educators and educational institutions, as well as facilitate connections between students seeking internships and job opportunities and companies seeking talented individuals.</p> <p>- Features:</p> <ul style="list-style-type: none"> • Educator Portal: The website included a dedicated section for educators, enabling them to submit applications for various teaching positions. Educational institutions, such as schools and universities, could then review these applications and make hiring decisions based on their specific requirements. • Student Portal: In addition to the educator aspect, HIRE-ME also provided a platform for students to apply for internships and job opportunities. Companies looking for suitable candidates could browse through student profiles and shortlist individuals based on their prerequisites. An automated email system was integrated to ensure timely communication between companies and selected candidates. <p>- Technologies Used: HTML, CSS, Bootstrap and JavaScript, React.js, (sql/php basic)</p> <p>- Team Project: Solo</p>

INTERNSHIP	About
1. Salesforce developer Virtual internship (Apr'23-may'23).	This internship was a great opportunity for me to learn about the Salesforce platform and gain hands-on experience developing Salesforce applications. I worked on a variety of projects and modules, including building a custom web application, creating a Salesforce Lightning component, developing a Salesforce API , Learning different Types Of Flows & Security, Apex, Testing & Debugging, VS Code Setup & CLI Setup and many more things...
2. Web development intern at Unified Mentor Pvt Ltd. (Nov'23-Dec'23)	In this internship my role is to create a working frontend interface for student-teacher appointment section , in which a student can book its appointments from their preferred teacher and faculty confirms appointment accordingly so that students can clear their doubts on spot after confirmation . Solving more student doubts increases the rating of teacher and accordingly their fees decides and for the student active participation may turns to subscription perk.

CO-CURRICULARS	
Coding	Hackerank- Achieved 5 star in C++ ; LeetCode – Solved 150+ DSA Questions

EXTRA-CURRICULARS AND ACHIEVEMENTS	
Achievements	▪ Secured 4 th position in Techno rally innovative hosted by Health-o-Tech club.

ADDITIONAL INFORMATION	
Hobbies	▪ Playing Games like Chess and Cricket to keep the mind active and fresh.
Languages	▪ English, Hindi
